3. EXECUTIVE SUMMARY

Section 71 of the Municipal Finance Management Act deals with requirements for a monthly/quarterly budget and performance assessment report distinctively, of which the objective is finally to report on the financial status of the municipality.

Condition 7.3 - Monitor and report on implementation – Section 71 Monthly Reporting and FRP

The municipality assessed the Financial Recovery Plan as at 31 May 2026 and updated progress for each pillar. See below narrative summary.

The municipality is still on the **RESCUE** Phase with a total of 178 key intervention activities were planned across four strategic pillars. As of the latest progress update, 87 activities have been completed, representing 49% of the overall targets, while 91 activities (51%) remain in progress.

Pillar 1: Governance shows steady advancement, with 5 of 23 activities completed and 18 underway, indicating significant ongoing work to strengthen oversight, leadership, and accountability mechanisms.

Pillar 2: Institutional Development has achieved 14 of 32 planned activities, with an equal number (18) still in progress. This demonstrates balanced effort toward capacity building and structural reforms within institutions.

Pillar 3: Financial Management reflects notable progress, having completed 29 of 53 activities, while 24 activities are still being implemented. This suggests active work toward improving financial systems, transparency, and resource management.

Pillar 4: Service Delivery, the largest component, leads in total outputs, with 39 of 70 activities completed and 27 in progress. This highlights significant improvement efforts in frontline services, though substantial work remains to reach full implementation.

Overall, the data indicates that the RESCUE Phase is progressing steadily, with nearly half of the planned interventions already achieved and the remainder at various stages of implementation. Continued focus across all pillars will be essential to sustain momentum and ensure full delivery of the program's objectives.

Debt impairment

- Actual expenditures are consistent with the anticipated collection rate of 75%. Furthermore, the municipality is implementing revenue enhancement strategies to recover outstanding receivables..
- Debt impairment is recognized when and if it is anticipated that cash flows generated by those assets will be insufficient to enable adherence to the financial commitment associated with debt issuance.
- Such determination is made on the basis of three aspects: whether cash flow from operations is projected to be fully applied to servicing debt and whether the commencement of that cash flow is appropriately timed; the timing of maturing principal repayments; and the funding sources (if any) that are being considered to address liquidity shortfalls as they arise.

Depreciation & asset impairment

The actuals expenditure is as per the projected estimate.

Finance charges

Interest is accruing on both Eskom and DWS debts. Nevertheless, the municipality is actively engaging in debt relief initiatives related to these entities to help reduce the overall debt burden.

- **90 Days Zero Sale**

This category comprises indigent and non-indigent consumers who have not made any electricity purchases—either through the internet, third-party vendors, or municipal offices—for a consecutive period of three (3) months.

The total number of debtors in this category is 7,449.

This trend indicates a potential non-usage or bypassing of the prepaid electricity system, which warrants further investigation to determine whether meters are faulty, tampered with, or if consumers are accessing alternative electricity sources.

- **Zero Sale since connection**

This category includes indigent and non-indigent consumers who have never made any electricity purchases—neither online, through third-party vendors, nor at municipal offices—since the installation of their prepaid meters. The period exceeds three (3) consecutive months, extending up to the date of data extraction from the attached report.

The total number of debtors in this category is 102.

This situation highlights a serious concern regarding non-activation of newly installed prepaid meters, which may stem from technical faults, illegal connections, or lack of consumer registration. Urgent verification of these connections is recommended.

- **Blocked pre-paid meters for tempering or amounts in excess of R3000.00**

This category refers to indigent and non-indigent consumers who are slow payers, purchasing electricity through online platforms, third-party vendors, or municipal offices, but whose accounts have accumulated arrears exceeding R3,000.00. These accounts have been blocked due to tampering or because their debt levels contravene the provisions of the new Credit Control and Debt Collection Policy.

The total number of debtors in this category is 7.

This category requires targeted follow-up and enforcement, including physical verification of meters, debt recovery actions, and possible legal intervention where tampering is confirmed.

- While employee-related expenses remain largely within acceptable parameters, the municipality's dependence on short-term creditors and inadequately backed cash reserves poses a substantial risk to its financial sustainability. Therefore, management actions aimed at enhancing cash flow, improving debtor recovery, and ensuring compliance with MFMA payment obligations are essential.
- The municipality has just met its short-term obligations, by showing an improvement on paying its creditors within prescribe time current liabilities.
- Outstanding Debtors are higher than annual revenue, which is concerning of non-payment of municipal accounts and has a negative impact which affects cashflows and service delivery.
